Mobile : +44 (0)7496 426314
www.urbondchildeducation.org

At the end of the course, learners should be able to:

- **Identify** and evaluate business opportunities using lean startup principles and AI-assisted ideation.
- Conduct live customer **discovery interviews and synthesise** findings to validate or invalidate assumptions.
- **Develop** a value proposition and business model canvas.
- **Use AI tools (DeepSeek)** to generate business ideas, conduct secondary market research, and produce business plan drafts.
- Create a basic **financial forecast** (non-technical, conceptual) and **funding pitch.**
- **Pitch** a business idea persuasively and defend it in an oral viva, including peer feedback as a judge.

Potential Career Paths

- Entrepreneur / Business Founder
- Start-up Owner or Co-founder
- Innovation and Product Development Executive
- Business Development Executive
- Marketing and Growth Executive
- Product Manager

Progression Opportunities

Learners may progress to further study in business, entrepreneurship, management, innovation, digital marketing, or related areas. The course also provides a strong foundation for individuals wishing to develop their own ventures or contribute to innovation and growth initiatives within existing organisations.

Stats & Insights: AI, Business & Startup

82% of surveyed small businesses believe AI adoption is essential to staying competitive.[1]

50% of small-business employees surveyed are already using AI at work.[2]

80 Hours of practical learning in AI, entrepreneurship, validation, financial forecasting and pitching.[3]
